

# YASH KHARCHE

**Full Stack Developer** with 1.5+ years of internship experience, seeking a full-time Software Engineering role

9182206875 | [reachyashk@gmail.com](mailto:reachyashk@gmail.com) | [Portfolio](#) | [LinkedIn](#) | [GitHub](#) | [Hashnode](#) | [LeetCode](#)

## EXPERIENCE

### The Hotspring

Dec 2023 – July 2025

*Full Stack Developer Intern — Remote*

*React, Tailwind, Python, Django, GraphQL*

Revamped the front-end architecture using **Tailwind CSS**, **ShadCN UI**, and **Vite**, improving design consistency and reducing development time by **40%**.

Migrated legacy components to reusable **ShadCN primitives**, decreasing code duplication by **30%** and enhancing maintainability across modules.

Designed an **asynchronous invoice generation system** using GraphQL and Celery, reducing invoice processing time by **80%** and eliminating manual monthly reports.

Automated task shot naming with dynamic component selection, cutting manual effort by **50%** and streamlining VFX production workflows.

Resolved AWS archive errors on the front-end by dynamically fetching storage class and restore status with **boto3**, improving download success rates by **25%**.

## PROJECTS

### Summarizer - AI PDF Summarizer [Live](#)

*Next.js, Tailwind, LangChain, OpenAI, Gemini APIs*

Built **Summarizer**, an AI-driven platform that transforms bulky PDFs into concise summaries, helping students and professionals save **hours of manual reading**.

Engineered a seamless **authenticated upload flow** using **Clerk** and **UploadThing**, enabling users to securely upload PDFs and generate instant summaries.

Designed a **responsive, accessible dashboard** with **Tailwind CSS** and **ShadCN UI**, improving cross-device user engagement by **30%**.

### Blink - Uptime Monitoring Platform

*TurboRepo, Next.js, Bun.js, TailwindCSS*

Built a decentralized **uptime monitoring** platform using TurboRepo and WebSockets, reducing validation latency by **40%** through real-time website status checks.

Optimized request-response handling with a **WebSocket callback-based architecture** in Bun.js, establishing a bi-directional communication channel between the validator and hub for **100%** accurate response mapping.

### ShayariKunj [Live](#)

*Next.js, Tailwind CSS, Prisma*

Built a poetry-sharing platform, attracting **150 users** with seamless content discovery and optimized database queries, improving Shayari retrieval time by **50%**.

Designed a roadmap for crypto payments and admin approval workflows, boosting user engagement and submission speed by **30%**.

### SolForge - Solana Token Launchpad [Live](#)

*React.js, TypeScript, Solana*

Built a **web3** token launchpad on Solana, enabling the creation and deployment of SPL tokens **50%** faster with wallet connectivity, real-time feedback and smooth animations.

## ACHIEVEMENTS

Received a **\$3000 grant** from **Superteam India** for developing **Blink**, a decentralized uptime monitoring platform. [Watch Demo](#)

Secured **2nd place** in **INNOFESTA College Hackathon** for building a solution to **optimize AWS cloud costs**. [GitHub](#)

## TECHNICAL SKILLS

**Programming Languages:** Python, TypeScript, JavaScript

**Frameworks/Libraries:** Django, Django REST Framework, Node.js, Express, React.js, Next.js, Tailwind

**Developer Tools:** Git, GitHub, GitHub Actions, Docker, Terraform, Postman

**Cloud and Databases:** AWS, PostgreSQL

## EDUCATION

**Hyderabad Institute of Technology and Management**

Hyderabad, Telangana

*Bachelor of Computer Engineering*

Nov 2021 – July 2025

GPA : **8.6/10.0**
